

Lloydminster O.T.S. Heavy Oil Show  
September 14 & 15, 2022

**Press Release**  
**For Immediate Release January 8, 2021**

**Lloydminster O.T.S. Heavy Oil Show Postponed to 2022**

After hosting numerous bi-annual heavy oil shows dating back to the 80's in Lloydminster AB/SK. The board of directors of the Lloydminster O.T.S. Heavy Oil Show has taken into consideration the current restrictions on public events and made the difficult decision to return to our regular date rotation of September 14 & 15, 2022.

"We had been really hopeful that we would be able to host the rescheduled show in 2021 and gather our industry experts together. With so much uncertainty around what restrictions will still be in place and with an abundance of concern for the wellbeing of our exhibitors and our community we are not able to proceed with the rescheduled show in 2021. We really look forward to catching up with you in 2022." stated John Stanyer chairman of the 2022 Lloydminster O.T.S. Heavy Oil Show

The LHOS is the world premier showcase of leading-edge technology and innovation in Heavy Oil development and production. The Lloydminster area has a reputation for creating and enhancing recovery of heavy oil. The LHOS is a world-class show with exhibitors and attendees from around the world and always is an event not to be missed.
